## CURRICULUM VITAE

---

### PERSONAL INTRODUCTION

My current positions are as Associate Professor at the Institute for Future Studies in Stockholm, also associated to the Centre for the Study of Cultural Evolution and Department of Zoology, Stockholm Uni. At the Institute for Future Studies I investigate how to apply thinking from biological evolution on cultural change, mainly examining democracy and religion.

At the Department of Zoology I mainly do research on primate brain evolution and the evolution of sexual size dimorphism. To study these issues, I do comparative analyses, mostly on mammals.

I have authored four books: *For Whose Benefit* (available in 2 languages), *God Probably Doesn't Exist* (8 languages), *Secular Humanism*, with Christer Sturmark, and my unpublished work *Det kulturella djuret*.

I am chairperson of the National Committee for Biology at the Royal Swedish Academy of Sciences, member of the working group for public support to non-fiction literature at the Swedish Arts Council, board member of Humanisterna (the Swedish Humanist Association) and the European Humanist Federation (EHF), fellow of the Secular Policy Institute, Washington DC, as well as member of Fri Tanke Smedja (rationalist think tank) and Uppsalainitiativet (climate change information association).
